DETAILED ACTION

The Preliminary Amendment filed on 12/28/98 has been entered and made of record.

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 63-65 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 63-65 recite a limitation of a plurality of logic blocks which is not supported by the specification. The specification teaches that "The Eeprom array 33 includes a number of Eeprom integrated circuit chips 43, 45, 47, etc." (page 7, lines 13-14) and "In the present invention, the Flash Eeprom memory is divided into sectors where all cells within each sector are erasable together" (page 9, lines 2-4) or "Flash Eeprom chip is partitioned into sectors" (page 9, lines 16-17). There is no place in the specification teaches a plurality of logic blocks. Therefore, the specification also fails to teach the limitation of "an address control logic circuit for managing addresses for the plurality of logic blocks" recited in claims 63-65.
